

## E-Safety Team Meeting Minutes

Date: 2.2.26

Present: GG, OL, LD, IM, BDQ, HW, SC, KD, LD, LB, IB, AB, Miss Evans, Mrs Giles

Today, we explored this year's theme for Internet Safety Day 2026: Safe and Responsible Use of AI. We discussed why AI is becoming an important part of online safety and how it affects young people's digital lives. The team looked through an assembly presentation provided by the UK Safer Internet Centre and adapted it to suit our school. We added in a few extra slides so that we could demonstrate the real power of AI and highlight both its advantages and disadvantages. We drafted a full script and divided this up, allocating speaking parts. The session ended with a complete rehearsal ahead of next week's assembly to the school.
